RoyPow your trusted partner

Retrofit your fleet to lithium-ion batteries

New technology.

Create great value for your business

Converting from lead-acid to lithium-ion is easy, cost effective and increases the productivity of the fleets and the operator.

Benefits of lithium-ion batteries

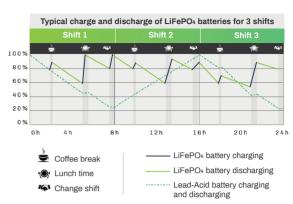

Lead-acid	LiFePO4 battery						
3 years design life	up to 10 years design life	Longer life 3 to 4 times lead-acid lifespan	 ✓ Reduces overall battery investment ✓ Eco-friendly ✓ Minimise the need for spares 				
Frequent maintenance	No maintenance	O maintenance no need for regular filling of distilled water and electrolyte	 No regular filling of distilled water Saving costs on labor and maintenance Less unplanned downtime and improved productivity No frequent battery replacements 				
1-2 years warranty	5 years warranty	Extended warranty bring you peace of mind	 ✓ Durable and reliable ✓ Reduces maintenance and labor costs ✓ Quality guarantee 				

Equipments always remain in service when needed

In the context of day-to-day operations, battery can be charged even during short breaks, such as taking a rest or changing shifts, effectively increasing productivity.

- Reduces the need for a full charge everytime.
- ✓ Eliminates the need for frequent time-consuming of
- Eliminates the risk of battery changing accidents.
- ✓ The battery in the truck can be charged directly during short breaks, and can be recharged at any time.

Rapid charging

Whether you have a single-shift or a large fleet working 24/7, fast charge is one of the most important advantages.

Why choose LiFePO₄ batteries for Aerial work platforms?

There are a lot of lithium-ion chemistries are for choices. RoyPow uses one of the most thermally stable and safe lithium-ion chemistries for industrial applications - lithium iron phosphate (LiFePO4 or LFP).

Except providing longer life, it is more energy dense, more stable and compact than lead-acid.

The battery packs are sealed unit requiring no water filling and no maintenance. It is ideal for batteries used in Aerial

Consistent power

Lithium-ion batteries deliver consistent high performance which maintain greater

LiFePO4 Lead-acid

productivity even toward the end of a shift.

No specific charging room required and frequent battery swaps

- ✓ Minimise the need to buy, store and maintain spares.
- Eliminate the cost and storage space required for additional lead-acid batteries.
- ✓ No gas or acid spills, no ventilation system needed when charging.

3 | www.roypowtech.com www.roypowtech.com | 4

Small investment, big return

Converting your battery to lithium-ion may require a higher initial investment, but its ongoing savings on energy, equipment, labour and downtime, can give you a more cost-effective bill in opposite.

The LiFePO₄ batteries can offer you...

- ✓ Longer life reduces overall battery investment.
- ✓ No maintenance saves labor and maintenance costs.
- ✓ No gas or acid spills, avoids the space, equipment and running costs of a battery room and ventilation system.
- Energy saving and less downtime, improve productivity.

5-year cost comparison to increase your overall return on investments.

Below is the 5-year expenditure table comparing RoyPow LiFePO₄ batteries with lead-acid batteries.

Save 70% expenses in 5 years

Purchases over 5 years	Lead-acid battery	LiFePO4 battery
Battery cost		5 _{yr}
Maintenance		5yr /
Electricity waste		5yr /
Installation		5yr
Shipping		5 _{yr}

Remark: Actual costs may vary according to local conditions.

RoyPow batteries with smart & integrated systems

can provide exceptional performance to get the job done and improve your productivity, which means less hours of unplanned downtime and more productive hours on your working.

Maintenance

5yr Warranty

Up to

10 **1 1 1**

3,500₊

Design life

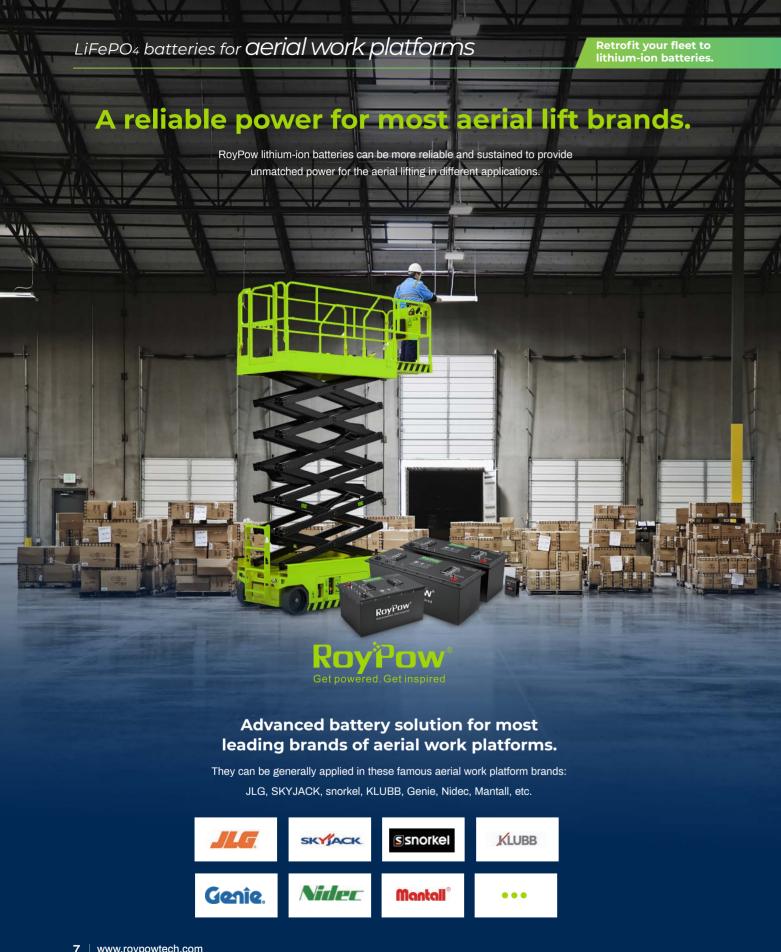

RoyPow batteries are waterproof and dust-proof, they can always maintain excellent performance and stable discharge rate under all-weather working condition.

Inbuilt protection

- ✓ Intelligent BMS is automatically for cell balancing and advanced battery management.
- ▼ The LiFePO₄ batteries have greater thermal and chemical stability

5 | www.roypowtech.com | 6

Which LiFePO₄ battery is suitable for your aerial work platforms?

To cover most of the aerial work platform ranges, our batteries are generally divided into 2 systems:

Do not be hesitate. your ideal batteries are definitely here.

24 V battery system

For minitype scissor lifts

48 V battery system

For large-scale scissor lifts

LiFePO₄ aerial work platform batteries - 24 V system

Retrofit your fleet to lithium-ion batteries.

Switch to new technology, lithium drop-in replacements for lead-acid batteries with existing equipments

- A full range of lithium-ion battery to power your aerial lifts.
- Maximum uptime and flexible lifting.

Solutions for minitype scissor lifts,

Efficient

- → High consistent performance without sudden power sag.
- A fast and efficient charging can reduce a lot of unplanned downtime.
- ✓ 10 years design life a worthwhile upgrade.

5 YEARS

Green and stable

- ✓ No acid spills, no noxious gas emissions.
- ✓ More thermal & chemical stability.
- Good for you and the planet.

Flexible and worry-free

- ✓ Zero maintenance, no need for water top-ups or electrolyte checks.
- ✓ No battery frequent swapping which can reduce the accident risks greatly.
- ✓ No ventilation systems required.
- No need for specific charging room.

expenses in 5 years

Specifications for 24 V system

5 years warranty

5 years warranty and timely technical support.

Steady output

LiFePO4 batteries keep a very steady power output . They are suitable for 24V applications.

Intelligent BMS

All time cell balancing and with multiple built-in protections including short circuit protection, high temperature protection, high voltage protection and so on, to get better performance and longer life.

Long life

3,500+ life cycles that outperforms traditional batteries.

Heating function (optional)

With heating function to warm up the battery at low temperature for charging and discharging.

They are all tested and certified:

FC UL (F KHS UF CA 9 www.roypowtech.com www.roypowtech.com | 10

LiFePO₄ aerial worl platform batteries

- 48 V system

Switch to new technology, drop-in replacements for lead-acid batteries.

- ✓ Power up your aerial lifts with lithium-ion technology.
- ✓ High sustained power in lifting!

Solutions for large-scale scissor lifts.

Ideal for outdoor or indoor works, even in rough terrain

Retrofit your fleet to lithium-ion batteries.

For better performance, put LiFePO4 to your scissor lifts

Cost-effective

- ✓ Save 70% costs in 5 years.
- ✓ Zero maintenance, no need for water top-ups or electrolyte checks.
- ✓ Less energy losses throughout all service life.

- Robust but safe in operation.
- √ 3,500+ life cycles at 80% depth discharge.
- ✓ Single battery can almost power much longer than traditional batteries.
- ✓ No power sag in a sudden.

Efficient

- ✓ No acid spills, no noxious gas emissions.
- ✓ No frequent battery swapping for multi-shifts operations.
- No specific charging room required.
- No charging memory, and can be charged rapidly.

To know more of RoyPow **LiFePO4** batteries

Quality and safety always come first. Except those benefits, we also have intelligent design from our professional R&D team.

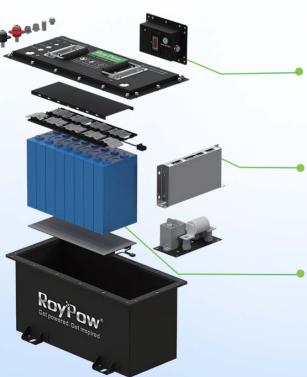

Fast charge

Intelligent design

Control panel included

Showing all critical battery functions in real-time, voltage, current, and remaining charging time and fault alarm.

Built-in BMS

For cell balancing and advanced battery management.

Battery pack module

Using LiFePO4 cells to insure stable and safe battery performance.

Battery management system (BMS)

The built-in BMS is equipped with automotive-grade components assuring safe, top quality and high energy density. To provide a fully optimized solution for demanding industrial applications.

BMS software ensures the battery to provide peak performance when in operation, to deliver longer run time between charges, to maximize the total battery lifespan and to communicate well between the charger, battery and users.

The BMS can offer:

All-time cell balancing and battery management.

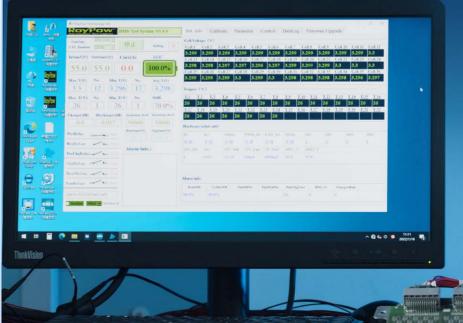

Through the intelligent balancing strategy, balancing between individual cells can be realized. The BMS can keep the battery's consistency at all times when in operation, maximizing the battery efficiency and improve the battery's working life.

Battery real-time monitoring and communication through CAN.

Monitoring cell voltage, electric current and battery temperature, so that any movement outside of normal range disconnects the cell or the entire battery.

Fault alarm and safety protection.

When the battery is less than 10%, it will beep to prompt for charging in case of stopping somewhere far away from charge station suddenly without notice. Over/under voltage, low/over temperature, over current or other faults will prompt to make the battery safe. Safety always comes first.

Retrofit your fleet to lithium-ion batteries.

Original chargers for aerial work platforms

RoyPow has developed chargers specifically for each type of lithium batteries to maximize the battery performance, safeguard the driving experience, and keep the best communication between our LiFePO4 batteries and the chargers.

Intelligent charging management

To use RoyPow charger, the battery management system (BMS) can control the charging current according to different temperatures and SOC of the batteries.

RoyPow's intelligent BMS ensures the safety of the battery and improves the charging efficiency.

When the battery is at low voltage, the battery can be charged at low current to ensure battery safety.

When the battery is less than 10%, it will beep to prompt for charging.

Over-temperature

Short-circuit

Anti-reverse

Over-charge

Smart display

Current limiting Automatic

Over-current protection

Wide voltage Constant current operation constant voltage

Smart, durable and efficient

Waterproof

Get rid of AC adapter to realise the real IP66 rated, no need to worry about water or debris like dirt or mud.

Anti-walking function

During charging process, without disconnecting the plug, the equipments cannot be started.

Corrosion protection & vibration resistance

Aluminum alloy design, one body forming technology which is more corrosion protection and vibration resistance.

Safe charging

Advanced charge algorithm ensures the batteries to be charged correctly and safely.

Intelligent protection

With the advanced technology of arc resistance hot-swap to keep the charger safe and extend its lifespan.

Natural cooling

It is sealed but with natural cooling function without a fan, for better heat dissipation capacity and to extend the lifespan.

Compatible

Our chargers are compatible with the voltages in most countries and regions. And it's applied to cater for various charge modes and multiple AC plugs for choices.

Single phase:

China 220V 50Hz America 120V 60Hz Europe 230V 50Hz Japan 100V 50Hz/60Hz

AC input port

can be compatible with plugs from different countries

DC output port

is configured as RoyPow exclusive charging adaptor

RoyPow, your trusted partner for one-stop energy solutions

RoyPow is founded in Huizhou City, Guangdong Province, China, with manufacturing center in China and subsidiaries in the USA, Europe, Japan, the UK, Australia, South Africa, etc., to settle global sales and service network.

We have specialized in the R&D and manufacturing of lithium replacements for lead-acid batteries for years, and we have developed a portfolio of intellectual property and an integrated design and manufacturing capability that spans all aspects of the business from electronics and software design to module and battery assembly and testing. We are vertically integrated, and this gives us the ability to provide a wide range of application specific solutions to our customers.

R&D and manufacturing highlights

- > Persistent technology innovation.
- > All-round testing.
- > Integrated design.
- > Advanced MES system.
- > Fully automatic production line.
- > IATF16949 system.
- > QC system.

By virtue of all this, RoyPow is capable of "end-to-end" integrated delivery, and makes our products out-performing industry norms.

Global sales and service network system

- > Timely delivery.
- > Hassle-free after-sale service.
- > Fast response technical support.

RoyPow has comprehensively unfolded its overseas market layout to realize the localization of R&D, manufacturing, marketing and service, then become your most reliable partner.

Upgrading to new technology, with our turnkey solutions.

Years of dedication on lithium-ion battery solutions. we are proud to offer customers professional battery solutions for:

- ✓ Low speed vehicles (LSVs) including golf carts and sightseeing cars;
- ✓ Industrial applications including forklifts, aerial work platforms and floor cleaning machines;
- ✓ Residential energy storage & portable power unit including home storage and portable energy storage products, as well as off-grid energy storage (for forest cabin, island villa without electricity, etc.);
- ✓ Marine including trolling motors, fish finders, other off-grid energy storage systems for marine, and marine power system;
- Corresponding original chargers for forklifts, aerial work platforms, floor cleaning machines, golf carts and various marine batteries.
- ✓ Vehicle-mounted energy storage & HVAC system including RV and truck energy storage and air conditioning system, as well as off-grid solar system for RV;
